DETAILED ACTION

Allowable Subject Matter

Claims 1-16 are allowed over prior art.

The following is an examiner's statement of reasons for allowance: ✓

Regarding claims 1-16, none of the prior art teaches or suggests an x-ray source having a target which is movable with respect to a support structure in at least one direction substantially perpendicular to an electron traveling direction and a flexible sealing member which couples an electron-generating chamber and a target chamber, constraining the target with the support structure as claimed in independent claims 1 and 11.

Claims 2-10 and 12-16 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haas et al. (US 3689790) teaches an x-ray target which is movable in a substantially perpendicular respect to an electron traveling direction but fails to teach an electron chamber nor a target chamber.

Carter (US 3737698) and Zingaro (US 3753020) teach a movable anode with x-ray target but fail to teach the flexible sealing member.

Lempert (US 3602686) teaches an electron beam welding apparatus but fails to teach the allowable subject matter above.
